

## Polishing Mops and Compos

Polishing usually starts after grinding with abrasive belts of at least grit 400 but preferably finer.

Depending on the final finish required, the first polishing operation is normally with a sisal mop and cutting or cut and colour compo. This is followed by a second operation with a cotton mop and cut and colour or finishing compo.

In some cases the finish resulting from a single operation with sisal or cotton mops and cut and colour operation is sufficient.

### Coloured and White Stitched Cotton Mops

Available in 12, 25, 36 and 50mm widths.  
From 50 to 250mm diameter.

Very close stitched - hard, Close stitched - medium, Open stitched - soft

Use with cut and colour, Tripoli or finishing compo.

### Full Disc Loose Leaf Cotton Mops

G-quality, for finishing. Swansdown quality for mirror finishing.

Available 25 and 50mm widths.

Soft with no stitching. Tapered bore.

Use finishing compo.

### Stitched and Sisal Mops

Available in 12, 25 and 50mm widths..

From 50 to 250mm diameter.

With tapered bore.

Use with cutting or cut and colour compo.

### Cutting Compo 54H

With the best combination of high cut and bright finish. Top quality grease ensures excellent lubrication and cooling without leaving smears.

Suitable for all metals.

Use with sisal, coloured or white stitched mops.

### Cut and Colour Compo 76 White

The bench mark cut and colour compo for stainless steel for over 10 years. With top quality grease that lubricates and cools without leaving any residue.

Often used for single stage polishing operations.

Use with coloured or white stitched mops.

### Cut and Colour Compo 70 Grey

Top quality cut and colour compo with less cut than 54H.

Suitable for all metals, particularly stainless steel.

Use with sisal, coloured or white stitched mops.

### Finishing Compo G300A

A very fine mirror polishing compo with low grease content. Produces the brightest finish of all standard mirror polishing compos.

Recommended for all metals, particularly stainless steel.

Use with white stitched, G-quality or Swansdown mops.

### Cut and Colour Compo 1947 SV

The leading Tripoli compo since 1947. Very economical, low grease content, bright finish.

Recommended for non ferrous metals only.

Use with coloured or white stitched mops.
